DETAILED ACTION

This office action is a response to the amendment filed on 3/13/2006.

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species:

Species A, drawn to Figs. 2(a)-7(b) for claims 1-10.

Species B, drawn to Fig. 1 for claims 11-17.

Species C, drawn to Figs. 11(a)-12(b) for claims 18-20.

The species are independent or distinct because Species A has a technical feature of forming a sacrificial material in a trench formed in a substrate and removing the sacrificial material to form a cavity into the substrate and Species B has a technical feature of forming a polysilsesquioxone layer over a portion of a substrate and etching the polysilsesquioxone layer by a patterned photoresist layer and newly submitted claims for Species C have a technical feature of forming a sacrificial material between a film and a substrate and positioning a slider on the etched layer after removing the sacrificial material.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic claim.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions

unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul D. Kim whose telephone number is 571-272-4565. The examiner can normally be reached on Monday-Friday between 6:00 AM to 2:00 PM.
